

# Amerock CABINET HARDWARE

## *Stratoline Streamlux DeLuxe Standard* Amerock

### FEATURES EXCLUSIVE OR ORIGINAL WITH Amerock

**DESIGN GROUPINGS** Distinctive design groupings at graduated price levels provide a wide selection of quality cabinet hardware for every purse and purpose. From its very inception the "Amerock" line has been noted for leadership both in character and diversity of design.

**MATCHED ENSEMBLES** Knobs, Pulls, Hinges and Catches of each design pattern "match" perfectly in design giving complete harmony to the finished installation. Plastic molded bases and color-embossed lines in six beautiful color combinations match the color scheme of any kitchen or bathroom.

**AMEROCK DEMONSTRATORS** Thousands of these famous displays are showing customers the beautiful new Amerock designs. This unique merchandising display demonstrates how each item is installed and how it works! Patented "Color Selector" (Pat. No. 2,312,532) aids in harmonizing hardware color trim with any room decoration.

**EASY WORKING CATCHES** Improved precision winged latch bolt mechanism (patent No. 2,233,278) provides lifetime service and requires no lubrication for smooth, positive action. Extra long throw of sliding bolt moving parallel with door assures perfect operation regardless of ordinary swelling or shrinkage of door.

**ENVELOPE PACKING** Individual wrapping and packing in printed envelope protects finish and prevents loss of screws and small parts. Templates or simplified installation instructions included where necessary. Look for the "Amerock" seal on every package—your guarantee of quality.

**BEAUTY-SEAL PLATINGS** Heavy underplatings seal pores of metal to prevent rust and tarnish. A heavy Chromium deposit is then applied, assuring a brilliant finish of lasting beauty. Wiping occasionally with a soft cloth is all that is necessary to restore the original brilliance.

# Wintite SASH LOCK

MADE OF HEAVY WROUGHT STEEL OR BRASS

### NO RATTLE—NO DRAFT

Eccentric action draws upper and lower  
windows tightly together providing air-  
tight joint.

### NO SLIDE-SLIP

Straight pull makes "Wintite" especially  
suitable for weather-stripped windows.  
Ideal for air-conditioned homes and  
buildings and for replacement purposes.

### TAMPER-PROOF

Draw-bar *locks* in place—cannot be  
moved without turning handle.

### TEMPLATE FOR EASY INSTALLATION

Template included with each "Wintite"  
Sash Lock automatically locates screw  
holes for easy application.

Available in all Standard Finishes

No. E7220—Steel  
No. E07220—Brass  
Patent No. D126,567

## NEW Amerock SASH LIFT

STREAMLINED FOR BEAUTY—ENGINEERED FOR STRENGTH

Positive finger-grip for raising window—com-  
fortable smooth surface for lowering. Made of  
Heavy Wrought Steel or Brass and furnished in  
all Standard Finishes.
